**(Excluding Mums, Asters, Pansies, Kale, and bulbs)**

*\* Cooler Weather\* \* Bright Colors\**

Are you ready for cooler weather? I know I am and some of my plants. Just because summer is nearing the end doesn't mean it's too late to pick up some great deals at 'The Bin'. The fall will still bring much to enjoy in the garden and is a great time to plant. Cool season veggies are ready. Pansies and mums are ready to brighten your garden.

Our fall décor will help put you in the mood for the change colors autumn brings. And it's BULB TIME! Don't regret your dismal tulip or daffodil display next spring. Plan ahead and the 'hard work' now will pay off.

Save some cash and join our Back to Cool Sale. Great time to fill-in the empty spots with bright colors for the cooler weather.

*Jeanette, Gift House Manager*

## ***THE COMFORT OF HOME AND YOUR GARDEN***

With all the crazy things going on around us, the one place we all want to feel comfort and enjoyment is in our home and in our own backyard. Most of us have had extended time working in our yards and getting our hands dirty this season, it is one of the things we seem to have control over.

We are here to help make your backyard space even more enjoyable and relaxing. For those of you who have been waiting to add some additional color or privacy, fall is a great time to ***plant shrubs, trees, and perennials*** to establish them for next season. Don't be afraid to add or try something new you may not have grown before, like lavender or hyssop, it may become your new favorite must have!

For those of you who just want a little splash of color, make sure you have some of the tried and true fall bloomers. ***Rudbeckias, goldenrod, echinacea, sedum, asters and mums*** all give you that lovely fall perennial color and are easy to grow. Burning bushes and ninebark are great anchors for your garden as well as any ornamental grasses which will also provide you wonderful winter interest.

Happy planting and may you all have a wonderful and safe fall season.

***Billie Jo, Perennial Manager***

***Burning Bush***

***Ornamental Grasses***

***Ninebark***

**Plant this FALL!**  
**Arriving at The'Bin**  
**Late August**

## *NOW IS THE TIME*

- Apply *Natural Guard HuMic* now to prepare your lawn for its winter feeding. *HuMic* is a granular humate which will improve soil structure and nutrient uptake.
- In addition to *HuMic*, a fall application of granular *Revive* will prepare your lawn for a winter fertilizer and help your lawn green up quickly next spring.
- Around Halloween, apply *fertilome Winterizer* fertilizer. Your lawn will store nutrients through the winter season and be ready to green-up quickly in the spring.
- September is a great time to seed your lawn. We carry locally-grown grass seed and we'll help you select the right seed for your lawn.
- Adding *organic material* to your vegetable beds is something you need to do every fall. We have locally-produced, bagged soil amendments in stock for your convenience.
- *Test your soil*. We have do-it-yourself kits and mailers to send your soil to CSU for testing. Bring us the results and we can help you decide what to do.
- You're always welcome to bring your lawn, garden and houseplant questions to *The Flower Bin's Diagnostic Center*. We'll identify the problem and offer you solutions. This is a free service we offer year-round.

*Michael, Hard Goods Mgr*

*"Dirty hands, iced tea,  
garden fragrances thick  
in the air and a blanket  
of color before me.  
Who could ask for  
more?"*

*Bev Adams,  
Mountain Gardening*

This describes the way I feel, this time of year. Most of the hard work is done, and now it is just a matter of waiting and watching while mother nature works her magic. Watching the tomatoes grow from a flower bud to a full flower to a baby tomato, and then on to one of the most wonderful of all of the gifts of the garden. Seeing the pollinators flit from flower to flower, spreading pollen around and gathering what they need to take to their home. Munching on the first green beans of the year, directly out of the garden. This is truly as good as it gets.

To keep this magic going, remember to feed your flowers and vegetables bi-weekly with a good quality fertilizer. Watch for problems (bad bugs and diseases) and treat as necessary. The Flower Bin staff is ready to advise you on any of these issues.

Keep up the good work. Enjoy your time in the garden, and be sure and enjoy all the fruits of your labor! You deserve it!

Happy gardening.

*Kim, Annuals Manager*

# Mums and Asters

*Autumn Glow Bronze - Early*

Early to  
Very Late Fall**

*"May the air be crisp, may the leaves be few, may the season of Autumn bring great bounty to you!" - Anonymous*

The joy you feel in the garden doesn't have to end because Summer is coming to a close. Indoor gardening is easier than you think, there are many well suited plants for growing indoors. Visit our Houseplant department during the Back To Cool sale for 20% off Houseplants.

The fact is there are many benefits of growing indoor plants; they produce oxygen, remove toxins from the air, increase productivity, decrease stress, create a relaxed environment, and enriches ones health and well being. No wonder it can be so much fun shopping for plants, and caring for them too! There are so many varieties to choose from, find something that calls your name!

Happy indoor gardening!

**Corinna, Foliage Manager**
